

For Immediate Release: Mog Implements is pleased to announce that our removable Fire Truck Body will be available starting this spring as an approved implement for the U-500 in North America. We will be able to tailor this unit to the needs and requirements of the customer. For example: High Pressure / Low Flow or vice versa. Additionally, we plan to release our combination suction sweeper into the North American market. Please call or email Gardi Willis for further information.

Mog Implements, LLC
